Aakash Jangeeti

Hyderabad, India|aakashroyal1710@gmail.com|+91 6301283783|LinkedIn|GitHub

Experience

Artificial Intelligence Intern, Tech Mahindra

- Engineered a **Security AI Companion**, reducing investigation time by **35%**.
- Built a RAG-based architecture using **Gemma & Mistral LLMs**, **LangChain/Haystack**, and **FAISS/Qdrant** for real-time contextual search and alerts.
- Containerized the solution using **Docker** and **Kubernetes** with an **MCP Server**, ensuring high availability.
- Automated SOC workflows, enhancing productivity and decision-making speed.

Software Developer Intern, Sarat Tech

- Developed a full-stack **Airline Reservation System** using **MERN**, serving **1,000+ users** in real time.
- Implemented **JWT authentication** and role-based access, reducing unauthorized access by **60%**.
- Optimized **RESTful APIs**, improving backend response time by **30%**.
- Built a scalable, responsive front-end with **React.js, Node.js, Express.js, MongoDB**.

Frontend Developer , Infomedia Entrepreneurship

- Designed and developed high-performance, user-friendly web interfaces using modern frontend technologies.
- Optimized UI components for responsiveness, accessibility, and user engagement.
- Collaborated with backend teams to ensure seamless API integration and smooth data flow.

Education

B.Tech, CSE (AI/ML), Malla Reddy University: 2021-2025

Class XII, Little Flower Junior College: 2019-2021

Class X, DAV Model School: 2019

Skills

Programming: Python, Java, JavaScript

Databases: MySQL, MongoDB, FAISS, Chroma

AI & ML: NLP, Machine Learning, RAG, LLMs, HuggingFace Transformers, LangChain, Prompt Engineering, Model Fine-tuning

Algorithm Development: Custom ML pipelines, Toolkit-based model implementation

Frameworks & Libraries: PyTorch, TensorFlow, scikit-learn, React.js, Node.js, Express.js

MLOps & DevOps: Docker, Git (GitHub/GitLab), FastAPI, MLflow

Tools & Platforms: Jupyter, VS Code, Postman, AutoCAD, REST APIs

Projects

Wandrly AI — LangGraph Inspired Multi-Agent Travel Planner

- Built a LangGraph-based multi-agent architecture integrating autonomous agents (Input, Weather, POI, Itinerary) for context-driven travel planning through natural language queries.
- Integrated Gemini LLM for reasoning and dynamic itinerary generation, enhancing personalization accuracy by 40 percent via prompt optimization and contextual chaining
- Developed real-time data pipelines with OpenWeather and Geoapify APIs, enabling weather-aware and location-based trip recommendations.
- Engineered modular, scalable workflows using FastAPI and AI orchestration techniques, improving agent communication efficiency by 30 percent.

Fullstack Agentic Placement-Prep Chatbot

- Implemented a Retrieval-Augmented Generation (RAG) chatbot for document-based question answering with 95% context relevance.
- Generated embeddings using Sentence Transformers and integrated with Hugging Face/Ollama LLMs for context-aware responses across 100+ documents.
- Designed a user-friendly Streamlit frontend with chat history and conversation management for up to 50 concurrent users.

Deepfake Defender: AI-Powered Real-Time Verification

- Developed a CNN/Transformer-based deepfake detection model trained on 1000+ videos/images from the FaceForensics++ dataset.
- Built a FastAPI backend and Streamlit frontend for real-time video/image evaluation within 10 seconds per file.
- Achieved 92% accuracy on test datasets.

MediSight AI: Automated Medical Report Intelligence

- Enhanced OCR-based pipeline to extract structured insights from 100+ medical reports.
- Integrated visualization dashboards and batch processing for scalable document analysis, processing several reports per hour.
- Reduced manual entry time by **70%** and built a modular, scalable system.

FlavorForge AI : Full-stack GenAI Recipe Generator

- Built an AI-powered recipe generator that crafts personalized dishes based on user-provided ingredients, cuisine types, and dietary preferences.
- Integrated Gemini API and implemented a secure Express + Mongodb Atlas Backend with recipe storage ,rating and version-controlled modifications .
- Developed a React + Bootstrap frontend featuring dynamic recipe visualization, search, and responsive UI design.

Certifications

- **Chatbot Website with Open Source LLMs** - IBM Developer Skills Network
- **Datascience with Python** - IIT Hyderabad
- **Machine Learning** - Reliance Foundation Skilling Academy

Research Publications

- **Profiling Students Engagement in Full Online Learning**, IJSREM, December 2023
- **Automated Email Sending Using Customized Features**, IJSREM, June 2023
- **Letter Recognition Using Deep Learning**, International Journal of Research Publication and Reviews, May 2024
- **Data Poison Detection in Distributed Machine Learning Systems**, IJIRT, April 2025

Achievements

- Participated in **BNB Hack Kerala 2025**, a national hackathon powered by BNB Chain.
- Participated in the **Global AI Summit 2024**, organized by the Government of Telangana.
- **Data Science with Python Workshop – Elan nVision 2023, IIT Hyderabad**: Gained hands-on experience in data analysis, visualization, and machine learning at IIT Hyderabad's annual tech fest.
